

Intersec Receives Country Award as France ISV Partner of the Year at Cisco Partner Summit San Francisco 2016

Paris, December 6th 2016, Intersec, the leading Fast Data software vendor, is proud to announce it has received a Cisco ® Partner Summit Country award for France as ISV Partner of the Year. Cisco announced the winners during its annual partner conference which took place earlier this month in San Francisco, California.

Awarded to exemplary channel partners, the Cisco Partner Summit Country awards are designed to recognize best-in-class business practices and serve as a model to the industry within their respective country. Areas of consideration include innovative practices, architecture-led successes, strategic business outcome-focused programs, seizing new opportunities and sales approaches.

“It’s an honor for Cisco to work with some of the best channel partners in France to transform the IT landscape that enables customers to differentiate and define their business strategies,” said Yves Mertens, Director of the Partner Business Group for Cisco France. “It is my privilege to recognize that the ISV Partner of the Year has been presented to Intersec for its outstanding achievement as a Cisco channel partner in France.”

“We are delighted to see concrete results of our collaboration. Cisco is an agile partner, with a tremendous knowledge of the key economic players, from major stakeholders, public authorities to innovative partners. Development of IP networks and IoT, added to the related analytics are a major growth trend for our technologies, benefiting and enabling the digitalization of our economy.” commented Yann Chevalier, Intersec CEO.

Cisco Partner Summit Theatre awards reflect the top-performing partners within specific technology markets across the country. All award recipients are selected by a group of Cisco Global Partner Organization and regional and theatre executives.

About Intersec

Intersec designs innovative software enabling companies to leverage their Big Data. Our disruptive technology crunches and consolidates huge amounts of data coming from heterogeneous network equipment and IT, and turns them into actionable insights in real-time. Applications range from Customer Base Management, mass-scale Location-Based Services, Smart Cities and Business Analytics.
